# WITT- Accessories for Oxygen Lancing

from the withdrawal of the gas up to the lance

## Lance Holders

#### for a safe and convenient holding of the lance

- against reverse gas flow and flashbacks
- for a quick and safe exchange
- optionally with

lever valve shut-off-valve emergency stop

- available as compact model with integrated safety and lever valve

## Hoses & supplies

#### for a quick and safe coupling and a reliable reeling-up

- hoses with safety coating
- automatic hose reels, secure interlock

## Pressure Regulator

#### high-performance and low-maintenance

- single pressure regulators or complete pressure regulator stations

#### Ball Valves

#### burn-out-safe, BAM tested

WITT Gas Controls LP Tel +1 888 948 8427

Installation example

380 Winkler Drive, STE 200 Fax +1 877 948 8427 Alpharetta, GA. 29004, USA witt-usa@wittgas.com

# **High quality components**

Lance holders for oxygen lances

Non-return valve with temperature sensitive cut-off valve

Lever valve for an immediate stop of the gas-flow by releasing

Compact Lance Holder, with lancing valve and non-return valve with temperature sensitive cut-off valve

Lance holder with "dead-man's handle"

#### Hoses & supplies

WITT Gas Controls LP Tel +1 888 948 8427 380 Winkler Drive, STE 200 Fax +1 877 948 8427

cover

Alpharetta, GA. 29004, USA witt-usa@wittgas.com

Safety hose with safety coating

Automatic safety hose reel with all-round roller guide, safe locking mechanism, also with pivotable wall mount and protective

## ... for every requirement!

#### Pressure Regulators

Compact pressure regulating stations 1x1 or manually changeable 2x1 for central gas supplies, stationary or to fit on bundles

Dome pressure regulator set, powerful and low-maintenance for mounting in pipeworks, own medium controlled

Compact pressure regulating station with dome pressure regulator and "dead-man's handle", with adjustable increase of operating pressure at start

Pressure regulators, for an efficient, steady and safe oxygen feed

## Ball Valves / Shut-off-Valves

Ball valve with female threaded connection, 3/8"- 1.1/4", up to 40 bar, burn-out safe

Gate valve for manual disruption of gas supply, 1/2"- 1.1/2", up to 25 bar
